## COLLECTION ALUNIS

### *Luna* **By Erol**

**The moon as never seen before and a world premiere with a realistic bronze cast**

A hyper realistic artistic representation of Earth's satellite, Luna is a 3-dimensional globe of 28 cm in diameter that perfectly reproduces the sculpted relief of our satellite.

Thanks to its size, it is easy to feel the diversity of its surface, observe it from every angle and take it into your hands - be careful, however, with the bronze statue that weighs more than 13 kg -.

All its craters, faults, mountains and seas, the results of intense meteorite bombardment, are represented with great precision : the technical definition of the surface of the globe is calculated numerically, the altimetry data is provided by NASA, the file resolution is 50 million points, one point for every kilometer of the moon. On a scale of 1 meter in diameter, the landforms have been exaggerated three times.

**Made in a prestigious French foundry, the Lunes d'Erol are unique works of art. An individually numbered limited edition has been produced to satisfy the greatest number of people.**

#### **Erol**

*Luna by Erol*

2019

## COLLECTION ALUNIS

### *Balades On The Moon* **By Luc Billières**

**That's one small step for a man...**

Luc Billières gives us an incredibly sensitive artistic representation that transports us to the gates of space: the impression of stepping on selenite soil, a strange sandy dust that is both grey and arid inhabited by imaginary craters, makes us feel its proximity to the earth while preserving its strangeness. A footprint on the moon, the first trace of the biped who begins the conquest of space. The footsteps of astronauts will fade from the surface of the Moon in a few million years. This mural sculpture of Buzz Aldrin's boot will be less durable, but more accessible. To enjoy stepping on selenite soil, Luc Billières offers us an incredible serie of paintings with relief.

Pièces uniques et originales de la collection « On The Moon By Luc Billières® »

**« On The Moon By Luc Billières® » est une collection originale exclusive conçue et réalisée par l'artiste Luc Billières pour CASSIOM®.**

## COLLECTION NEBULLA *Eta Carinae* By Sébastien Crêteur

An explosion of colours !

Cassiom has entrusted artist Sébastien Crêteur with an artistic exploration of this captivating and colourful universe. A talented artist with also passionate about astronomy, he offers us a spectacular representation of the southern sky : Eta Carinae, an amazing formation born from a collapse and explosion of stars, otherwise known as the Homoculus Nebula. In his creation, the artist gives the images that we already know a depth and a particular poetry.

**Unique and original piece from the collection "Nebulla By Sébastien Crêteur©**

**"Nebulla By Sébastien Crêteur© " is an original and exclusive collection.  
designed and created by the artist Sébastien Crêteur for CASSIOM®.**
