## The Artist

### Erol

St Mandé-born in 1953, lives and works in Vendoeuvres, France

*An engineering graduate from Arts et Métiers, Erol imagined a series of sculptures based on his mastery of digital technologies.*

*It is with computer tools that he expresses his universe more precisely.*

*A visionary and sometimes an activist, he questions us about our perception of the world. All his works have the same fixed idea: to show what makes the essence of things. Whether he simplifies his works by only keeping the fundamental lines or he pushes precision to the extreme, as in his particularly realistic representation of the planets and the moon, he does it to always show us the imprint of reality.*

## COLLECTION ALUNIS

### *Luna* By Erol

### Bronze and genuine Carrara marble

*At the artist's request, the art foundry, Fonderie Fusions, has created the bronzes of Luna by Erol.*

*Every cast is unique, numbered and signed by the artist with the official seal of the foundry.*

*From the "master" mould made by the Créaform company, the foundry craftsmen used the lost wax casting process and then performed a traditional patina on bronze.*

*Executed upon order in 4 weeks, you can choose the color of the patina which suits with your desires.*

### *Luna Light* By Erol

Resin & Steel

### *Luna Light*

Manufactured using the rotational molding process. It consists of a molding of plastic material by rotation to reproduce the surface of the moon to the millimeter.

The study of Luna's mould was paramount. The artist supervised the work of the moulder so it was closer to the final piece.

As a result, a great deal of attention has been given to its finish, especially so that the joint plane becomes invisible.

The final step, entrusted to a patination expert, is to reproduce the natural hues of the moon.

However, in agreement with the artist, Cassiom offers coloured versions.

Handmade, each sculpture is unique, whether silver grey or gun metal.

In a limited edition of 300 individually numbered pieces with a certificate from the artist, the color of the patina fits to your decoration and your lunar dreams.

*Indoor/outdoor, Luna Light has however to be handled with care.*
